

points

tight clusters  
clustered group none  
different farthest plot point  
bunches three distance they  
groupings most overlap  
circles more separation  
apart linear non clustering circle tightly overlapping others  
very touch between has close dots sets less scattered red smallest  
grouped separated shape ovals connected size  
intersection concentrated each other ovals isolated  
small spacing rest trend farther color onethan distinct  
separated two together touching plots spaced have from smaller  
compared with and least  
not the out data  
separation  
separate shapes spread
